Be READY for realistic nursing skills simulation.

MVR-Nursing is a virtual simulator designed to train nurses in professional skills by immersing them in clinical practice scenarios with a wide variety of virtual patients.

Safely perform assessments, examinations, and administer treatments in a realistic environment without harm to live patients.

Features clinical case libraries with comprehensive overviews of emergency care, ICU management, medical care, and pediatric care.

Customize medications and scenarios while evaluating performance against standard assessment systems and protocols.

Customize medications, scenarios and environments to suit individual needs.

The highest level of graphics and immersion in a virtual medical environment.

KEY FEATURES:

- Lifetime license
- Automatic updates
- Haptic feedback
- Patient interaction with dialogue
- Unique teleportation feature
- Minimum space required for use (4 sq. ft.)
- Over 50 interactive items
- Optimized setup, load and response time

EFFECTIVE PRACTICE OF:

CPR, airway management, defibrillation, ECG, medication administration, and more.
