

Adult Deluxe Airway Management Trainer with Board

The Deluxe Airway Management Trainer is available with or without a board, so that the existing vinyl head on a PDA STAT or STAT Simulator can be replaced.

The head features include anatomical landmarks, tongue oedema, laryngospasm, cricothyrotomy, and bilateral carotid pulses. All agency-specific field airway adjuncts can be used while practising with this product.

Instructions are included showing how to disconnect the head and use the colour and/or size-coded connections for easy installation of the replacement head.

The only head of its kind on the market.

- New material and design
- More life-like feel than older plastic models
- Greater stretching characteristics in the face
- Will resist damage caused by aggressive laryngoscope use
- The tongue is more flexible than in older plastic models
- The vocal cords are in a more neutral position than in older plastic models
- Easier to clean than the older plastic models
