Introducing I.A.F.F. Rescue Randy

Full-body simulator that is uniquely designed for realistic training on handling, transportation, rescue and extrication.

- Weight-adjusted with fully-articulated joints to mimic a real person
- Designed with the help of the International Association of Fire Fighters for fireman’s carry/drag
- Rugged, reliable and durable
- 100% hand-made in the USA

I.A.F.F. Rescue Randy:
Life-like training solutions for real-life situations.

- Realistic simulation for the most common rescue and extrication scenarios:**
- Automobiles, utility poles, conduits, mine cave-ins, tunnels and other confined spaces, collapsed buildings, smoke rooms
 - Ladder carry-down on a stretcher protocol, mountain rescue stretcher instruction

Versatile & heat-resistant
Can be dragged anywhere, in any real-life scenario, and withstands high heat

Offers the best representation of human anatomy
Fully-articulated joints and weight distribution according to human weight distribution chart simulate what it’s like to carry a real person who is limp and heavy, not stiff

Available in a range of weights Including larger weights to train firefighters to carry/drag people of different body compositions

- 145-lbs
- 165-lbs
- 175-lbs
- 200-lbs

This manikin is intended to be used as an instructional aide in the teaching and demonstrating of live rescue training. Actual product may vary slightly from photo. Nasco reserves the right to change product color, materials, supplies, or function as needed.
