3 Year  
Warranty

What's in  
the Box?

- ✓ Full Body Manikin
- ✓ Intubation Head
- ✓ IV Arm
- ✓ Pulse Bulb Assembly
- ✓ Carry bag

This 165 cm (5 ft. 5 in.), full-body trainer combines our standard intubation head and IV arm with a non-electronic body.

Life support instructors utilising advanced skills, such as airway management and IV administration, will appreciate this training manikin. It is particularly popular with Ambulance, Fire and Police Services, Air Ambulance Services and Trauma Rescue Organisations and is one of our best-selling products.

Combine with either a WMD (Weapons of Mass Destruction) or CBRNE (Chemical, Biological, Radiological, Nuclear, Explosive) scenario to facilitate the practice of DECON

(decontamination) processes. This creates the perfect setup for use while processing through decontamination stations.

Water won't harm this trainer, and you can initialise advanced life support treatment (ALS) as you are flushing contaminants.

The addition of a casualty simulation kit to this manikin broadens its use for mass casualty incidents (MCI).

Please note: this manikin does not have ECG features.
