

qubeSERIES Monitor Interface

Powerful simulation systems for
your patient monitor/defibrillators.

SKILLQUBE® offers a wide array of patient monitor/
defibrillator options designed to support different named
medical device manufacturers available in the market
(Stryker, Zoll, Weinmann and Schiller); a generic version is
also available for purchase.

Our Packages

1. **Lite** – One generic interface
2. **Plus** – One generic interface, one branded
interface
3. **Pro** – One generic interface, five branded
interfaces

Mobile debriefing system with audio/
video recording for simulation training

System mobility allows the flexibility to
train in the classroom, on the ward, or in
an ambulance

Change of perspective: flexible
change between up to four cameras
during training

Seamless integration with all patient
simulation systems

Recording the training allows analysis of
the training scenario from all angles

Multiple marker sets, defined by
you and controlled via the marker
keyboard, trackpad or iPad

Interfaces

- qube15 (LIFEPAK 15-STRYKER)
- qubeX (X-Series - ZOLL)
- qube3 (Corpuls3 simulation)
- qube3T (Corpuls3 simulation)
- qube7 (DEFIGARD Touch 7 - Schiller)
- qubeZERO (Generic)
- qube20e (LIFEPAK 20e)
- qubeR (Zoll R-Series)
- qubeMC (MEDUCORE - WEINMANN)
