

TERi™ Androgynous Geriatric Patient Trainer

A comprehensive male/female elderly patient care trainer for medical simulation. Evolving from our GERi™/KERi™ full-body manikins, it has a more realistic look and feel, accurately representing the human anatomy. Weight is distributed to represent a real patient, for lifting and carrying.

Each version is affordable and durable with upgradable items.

- 1. Geriatric Patient Care Trainer** – General patient care, daily living assistance simulation platform.
- 2. Geriatric Patient Skills Trainer** – Physical skills practice simulation platform with injection/IV, catheterisation, cardiovascular and respiratory support.
- 3. Geriatric Patient Simulator** – Comprehensive and complete simulation platform including patient monitoring capability.
